Hide From Uninstall List Crack +

Hide From Uninstall List is a tiny utility designed to help you mask applications in the Add/Remove Programs of Windows for various security and privacy reasons. Enables you to hide the entire Apps & Features section Since the application is portable, you do not have to bother with installation or configuration, but rather simply decompress the archive in the desired location on your hard drive. The tool comes with an intuitive interface that consists of the list of programs that are currently installed on your computer in a list along with the name of the publisher and its current state. As you probably hinted, hiding a specific program entails you mark it and hit the "ghost" button from the menu. Alternatively, you can hide the app from the context menu. It is worth mentioning that the app allows you to hide the entire Apps & Feature section, an option that can come in handy when you are sharing your computer with several users. The program simplifies the method of masking various apps a great deal, especially since the normal procedure entails that you find the correct registry key in the Add/Remove Programs in

regedit and delete it manually. A straightforward program for hiding installed apps and enhanced privacy The app displays the full list of programs along with the patches and updates installed. The feature makes this app useful in case you want to check on whether you performed the latest updates as well.Hide From Uninstall List Download Hide From Uninstall List 1.01 Download Hide From Uninstall List 1.001 download Hide From Uninstall List 1.002 download If you are looking for a way to make your PC boot faster, hide the windows startup list and Windows 7 boot list is the perfect choice for you to make sure that booting is fast and easy by clicking just one button.
